Buffer DRAM Size : 32 Mbytes
OneNAND Flash : 4 GB

Get SSD-like Performance Today
The Seagate® Momentus® XT drive is a solid-state hybrid with Adaptive Memory™ technology, enabling the drive to deliver SSD-like performance along with higher capacity. The Momentus XT drive is designed for all standard laptop PCs and is OS-, driver- and software-independent, making this drive easy to integrate and easy to use. Adaptive Memory technology enables the drive to tailor performance to the user. Whether you are gaming, editing digital media or crunching numbers, performance is optimised and ready for your next move.
